SUMMARY

I'm looking for a Frontend developer position (JavaScript/React). I have 11 months of commercial experience. I would like to become a part of a progressive team, to resolutely develop my technical skills and knowledge by implementing complex projects and learning new technologies in a long term. I'm ready to consider remote work or full-time employment. I have experience in creating team and own commercial projects using HTML5 (semantics), CSS3 | SCSS | Adaptive and Responsive Design, JavaScript, React.js, Redux.
